All data as of December 31, 2024. AUM as of November 30, 2024. Average premium/(discount) represents the average premium/(discount) at which the ETF traded over its NAV over the last one year. Tracking Error represents the difference in returns of the ETF when compared with that of the benchmark/index it replicates. Liquidity classification is based on average daily trading volume (ADTV). ETFs with ADTV in excess of ₹1 crore have been classified as having 'High' liquidity, those between ₹10 lakh and ₹1 crore as having 'Moderate' liquidity and those with less than ₹10 lakh as having 'Low' liquidity.
